Im reading through all of these, one at a time. I loved these comics when I was a kid; I read them in the mid-80s, and I still (with volume 4) havent gotten up to the ones I read back then. This book introduces Rogue, one of my favorite x-men, although she doesnt really get developed as a character until volume 5. It also includes the first x-men graphic novel which was (loosely) the plot of the second movie. My only complaint is that all the comics printed here are presented in black and white... Id gladly pay a few dollars more for a color reprint (I mean come on guys, the originals sold for \$1 each in color!)
